## PROJECT DESCRIPTION

### Influent Pump Station and Force Main Improvements & WRF Primary and Secondary Basins Refurbishment Project (JN's 217024 & 217032)

The work will occur at two primary locations: 1) The Influent Pump Station (IPS) site located within the Padre Dam Municipal Water District Maintenance and Operations Yard at 9120 Carlton Oaks Drive, Santee, California 92071, and 2) Ray Stoyer Water Reclamation Facility (WRF) located on District-owned property at 12001 N. Fanita Parkway, Santee, California 92071.

#### IPS Site

Rehabilitation of the Influent Pump Station sewer wet well

- Remove existing stairway, grating, water control gates, and miscellaneous valves, fittings, piping, and supports;
- Repair deteriorated concrete in the intermediate and lower levels;
- Restore grating support ledger and install new FRP grating;
- Surface preparation and application of epoxy liner in lower level;
- Install new fiberglass reinforced plastic (FRP) stairway;
- Install new water control gates;
- Install new miscellaneous valves, fittings, and pipe supports.

Sewer force main plug valve improvements

- Remove existing precast concrete manhole valve enclosure and adjacent piping;
- Remove and re-install existing plug valve;
- Install new piping and fittings for existing plug valve for buried service.

Construct new sewer force main manhole

- Remove a section of existing 24-inch PVC force main;
- Install new concrete manhole;
- Install air valve piping to existing air valve and new odor control canister.

#### WRF Site – Primary & Secondary Sedimentation Basins

- Concrete basins crack repair;
- Concrete basins surface preparation;
- Concrete basins resurfacing with repair mortar;
- Installation of new stainless steel wear strips in the concrete basins.

All of the above improvements will be located within completely disturbed areas. Temporary construction-related impacts are anticipated and no other environmental impacts are anticipated.
